

## Environmental Policy

We manufacture or purchase a variety of brackets, spigots and embellishments to compliment the range of columns supplied from our factory in Port Talbot, South Wales. Our range of products also includes the Echalon hinged column, bespoke traditional and contemporary architectural brackets and street furniture. We import aluminium columns that are manufactured from 100% recycled aluminium in the most efficient processes achievable. Specifically fabricate them to clients requirements and supply direct from our factory.

The Aluminium Lighting Company's areas of greatest environmental impact are waste disposal, material and energy use.

Top management will educate & encourage all levels of the organisation to understand, buy into & contribute towards the Environmental system for the benefit of customers, the organisation and most importantly the local Environment.

In recognising these impacts and demonstrating a commitment to pollution prevention and continual environmental improvement, Aluminium Lighting Company will:

- Comply with the requirements of all relevant environmental legislation and with other requirements such as NHSS6 that the company subscribe to.
- Commit to the Waste Management Hierarchy of – Prevention, Re-use, Recycle, Recover & Disposal.
- Provide a framework for the setting and reviewing of environmental objectives & targets.
- Document, implement, maintain and integrate the Environmental & Quality Management System's.
- Commit to the education and training of all employees in relevant Environmental matters.
- Our environmental aspirations are communicated to all relevant stakeholders of the company.
- Actively create an environment that will encourage continuous improvements and prevention of pollution by all stakeholders of the company.

This policy will be subject to annual review, will be communicated to staff and made available to all interested parties and stakeholders.
